Lancaster Farming

VOL. 14 NO. 30 | Lancaster Farming, Saturday, June 21, 1969 | $2.00 Per Year

Two local 4-H Leadership Council delegates to the 10th annual 4-H Congress this past week at the Pennsylvania State University, check program responsibilities with Leland G. Jinks, center, State 4-H Club leader. The delegates are: Peggy Eshleman, left, of RD 1, Pequea and Jesse Balmer of RD 4, Lititz. The Leadership Council, consisting of 60 outstanding 4-H members, is the ruling body for the 900 young people from 67 counties that attended the four-day session which ended Thursday. Congress is designed to increase members skills in leadership and citizenship.

Three Local Dairymen Win District Honors

Three local dairymen won district honors Thursday for the most outstanding Young Dairy Cooperator for 1969, in a Young Dairy Cooperator Contest conducted by Inter-State Milk Producers' Cooperative, Philadelphia.

District winners were Robert H. Kreider, Quarryville, District 3· Walter C Martin, New Holland, District 6, and J Mowery Frey, Jr, Lancaster, District 7

Twenty-one young dairymen participated in a program for the selection of top young dairy farmers, who are members of Inter-State Milk Producers' Cooperative

Wilbur Seipt, of Lansdale, president of Inter-State, welcomed this unique group of dairymen.

Dr James E Honan, general manager, discussed the Cooperative's marketing program

Herbert W. Wessel, Jr., president of Pennmarva Dairymen's Cooperative Federation, Inc., Baltimore, Md, commented on the future role the Federation would play in milk marketing for its 5,000 members Arthur B. Morgan, Dealer Relations Director, New Holland Machinery Company, New Holland, was the main speaker on the young dairymen's program. Morgan briefed the young milkmakers on the need for improved industry relations and the future needed relations with consumers.

The six finalists selected were J. Mowery Frey, Jr., Lancaster, Robert L. Knutsen, Rising Sun, Md; Ronald B Reich, Winfield, Pa.; Walter T Morris, III, Chestertown, Md; Donald E Hileman, Williamsburg, Pa; and Robert E Smith, York Springs, Pa

During the panel discussion the six dairymen were quizzed by the judges, who were John L Morris, Chairman, Extension Dairyman, University of Maryland, College Park, Md; Wm M. Stout, Director of Field Service, Sealtest Foods, Philadelphia, Pa; and Wm Johnstone, Professor, Agricultural Economics Extension, Pennsylvania State University, University Park, Pa.

George R. Brumbaugh of James Creek, Pa, District 13 Director was chairman of the program for these outstanding young cooperators

Farm & Home Center Mortgage At $150,000.

The directors of the Farm & Home Foundation at a meeting Tuesday announced the recent fund drive amounted to $67,000 in pledges and donations Therefore, the mortgage is presently $150,000.

The directors will study the adviseability of converting space in the basement of the Farm & Home Center into additional office space This will be done because the County Superintendent of Schools may be interested in an additional 2200 square feet of office space

Pullet Chicks For Broiler Hatchery Up 34% Over 1968

Domestic placements of pullet chicks for broiler hatchery supply flocks by leading primary breeders totaled 4,046,000 during May 1969 This was 34 percent above domestic placements in May 1968 Total placements (do-

Local Girl Elected Advisor On 4-H Congress Leadership Council

Peggy Eshleman, 17, RD #1 Pequea, was elected to be a Leadership Council advisor for next year's 4-H Congress at the conference held this week at Penn State.

Miss Eshleman, one of five advisors from the entire State, was elected to the post by the Leadership Council of the Southeast area. She is the daughter of Mr. & Mrs H Clay Eshleman and has been active in 4-H Club work for seven years She graduated from Penn Manor High School this month and will enter Lankenau School of Nursing, Philadelphia, in September

Peggy's 4-H activities are many: she is a member of the Penn Willows Club, having served as the President last year and is treasurer this year, she is a project leader and a junior leader of the entomology club She has two brothers and a sister in 4-H.

The conference is held each year to give delgates a chance to develop an appreciation and understanding of national problems, practice leadership and responsibility in group action and share ideas and inspiration to others when they return home

8 00 p m —4-H County Council, Farm & Home Center

4-H Livestock Judging Session On Monday

The first practice session for 4-H Livestock Judging work will be held Monday, June 23

County Agant Max Smith, in announcing the first practice session at 6 p m. at the Farm and Home Center, said this is an excellent opportunity to learn more about an important part of livestock club work

From the Judging Work this summer two 4-member teams will be selected for the State contest in August at Penn State A junior team composed of members from 14 to 16 years of age as of January 1, 1969, and a senior team of at least 14 years as of January 1.

Mark Nestleroth has again agreed to help Smith coach the teams along with four boys from last year's senior team.

4-H Dairy Roundup To Be Held July 29 & 30

The annual 4-H Dairy Roundup will be held July 29-30 in the Guernsey Sales Pavilion, according to Victor Plastow, associate County agent.

Plastow said that this year because of limited space, the show will be divided into two parts.

Ayrshire, Brown Swiss, Guernsey and Jersey cows will be shown the first day from 3 to 7 p m. Holsteins will be shown during the same hours the second day.

County Dairy Princess Contest Cancelled For Lack Of Entries

The Lancaster County Dairy Princess Contest has been cancelled for lack of contestants

Mrs. Herbert Royer, chairman, said this week that no girls filed applications and the event slated for next Tuesday has been cancelled.

The event started in 1964, but in recent years there have been few contestants In 1967 there were only three entries and last year four

Unless the contest is revived and a local princess chosen before August 15, Lancaster County will not be represented at the state contest in September at Harrisburg.

Summer Egg Prices Forecast Above Spring; Near 1968 Level

WASHINGTON — Egg prices this summer are expected to be "significantly above spring and probably near last year's level," the U S Agriculture Department predicted this week

It said that prices in the fall months "may average moderately below a year earlier."

Broiler prices may soften slightly in the months ahead, according in USDA

The poultry price forecast was included in USDA's "Poultry and Egg Situation" which is issued 5 times a year.

The report noted that May egg output slightly exceeded 1968 levels for the first time this year. Some further gains are forecast through summer and into fall

"The larger number of replacement pullets started through February will be in the laying flock by early summer and will probably bring the flock size above last year," the report stated. "Furthermore, there has been an increase in the rate of lay"

The report noted that egg prices to producers averaged 40 4 cents per dozen in the first quarter Prices declined in April and May as output increased seasonally.

On broilers, the report pointed out that marketings in April and May were up 8 pc, and broiler chick placements indicate that the wide margin will continue through July

So far this year, broilers have shared in the unusually strong demand for meats, despite the larger supplies of red meats. Prices also have stood up well, USDA said

Rising consumer incomes and increasing prices of competing meats have been a factor in this gain

Peach Growers Veto Ad Funds Request

HARRISBURG — Pennsylvania peach growers voted Tuesday against a self-assessment plan to raise funds for advertising and promoting peaches.

The plan was defeated even though the "yes" votes (67) were greater than the "no" votes (51). State law requires that 66⅔ of those voting favor the assessment "Yes" votes totaled 56 8 percent of those casting ballots.

The proposed assessment was three cents a hundredweight for fresh market peaches.

Voting was done through ballots which had been mailed to growers. The ballots were returned to the State Agriculture Building where they were counted by Paul McPherson, New Park; George Unger, New Berlinville; John F. Peters, Gardners; and Earl Strite, Harrisburg. The men, peach growers, were selected by State Agriculture Secretary Leland H Bull.

The Pennsylvania Agricultural Commodities Marketing Act which permits raising funds through self-assessment also requires that the production volume of those voting for assessment amount to at least 50 percent of voters' production

Monitor-Control COMBINES

Just one of the features you're sure to like on these new Monitor-Control combines is revolutionary Even-Flow cleaning.

What is Even-Flow cleaning? First of all it involves the use of two rotary-disc fans, mounted in an air intake housing, approximately 6-feet off the ground, on the right hand side of the machine. Clean air is drawn in from both sides of the housing and forced down a chute into a plenum chamber below the sieves. Here, by means of scientific baffling, the air is diffused and directed up and through the entire sieve area to provide an outstanding, trouble-free job of cleaning.

With Even-Flow, you can forget about windboards and shutters—about fan bottom shields and screens—about trashy crops, side-winds, and everything else that causes time-wasting aggravations. All you do is dial a speed to suit the crop—and forget about it.

From Where We Stand...

Of Deepest Concern

Higher education is threatened with collapse. That is the only conclusion that a great many people feel can be drawn from events that have accompanied campus disorders. Their feeling is buttressed by a single paragraph from an article in The National Observer on the question of whether university faculties can handle the rising state of anarchy that is taking over the nation's campuses. One afternoon, says The National Observer, "For about 30 minutes . . . Cornell's president, Dr. James A. Perkins—denied even the courtesy of a chair by militant students—sat on the floor of the stage in Barton Hall, the university field house, red-faced, humiliated, and sipping a can of root beer. To the accompaniment of derisive laughter from the 6,000 students gathered in Barton Hall . . . a . . militant student leader, referred to Dr Perkins as 'P' and 'Brother Jimmy' and told him to 'sit down, Jimmy. I'm going to talk and you can talk when I'm through.' Half an hour later, Dr Perkins got to his feet and described the week's events at Cornell as 'the most constructive move' the university has ever taken"

The spectacle of a college president forced to sit on the floor in abject submission while enduring the insults of "students" will strike many as unrelated to anything that could be called a "constructive move" On the contrary, the stark facts as related by The Observer have a nightmarish quality They place a U S. college president in the position of a defector in a dictatorship-ridden country Other events summarized in The National Observer article include armed seizure of university buildings, not only at Cornell, but elsewhere. At Harvard, as at Columbia University, pictrues have shown almost unbelievable scenes of mobs occupying the offices of college officials.

Often, according to press reports, faculty members join striking students. Frequently, what starts out as a revolt of a few dissenters snowballs into mass meetings of thousands and closure of classrooms One of the most puzzling features of the disorders is a lack of clear response to the most flagrant acts of violence. In the case of Cornell, according to The National Observer, university administrators acceded to demands of dissenters after Cornell was given just "three hours to live" A similar bowing to pressure and threats took place at Harvard In the words of The Observer, "At both schools the students' grievances, real and imagined, seemed to be exacerbated by administrative ineptitude and previous faculty indifference" What are some of these student grievances that we hear so much about? Life magazine published the "Strikers' Manifesto" as posted by Harvard students The Manifesto gave eight reasons for striking—among them, because classes are a bore. Other points in the Manifesto included the demand for more power and a demand to smash "the corporation."

The portents of spreading strife on U.S. campuses is beyond calculation at a time when technology and the problems of society require a higher intellectual capacity than ever before. The highest centers of learning in the land seem to be drifting helplessly in a sea of strife. Even more serious than a threatened decline in standards is the threat to freedom itself. President Nixon has said that college administrators must not "surrender to force." He warns, "There can be no compromise with lawlessness and no surrender to force if free education is to survive in the United States of America." His warning makes the issue of strife on the campuses a matter of the deepest concern to all Americans. At least that's the way it looks from where we stand.

Hail To Summer

Every season of the year has its special features—blossoms in spring, autumn colors in fall, the magic of Jack Frost in winter and the azure skies of summer. However, summer, which begins its tour of the Northern Hemisphere on June 21, also features the full blooming of our national curse—the litterbug. And this year, as on each succeeding year, there will be more evidence of this blight than ever before.

Us farmers who value and respect natural beauty can but watch in helpless outrage as the veritable scum of the human race strikes swiftly and usually unseen—throwing beer cans and pop bottles from speeding cars or vanishing without a trace from ravaged campgrounds and picnic sites. Often this creature we have dubbed the litterbug passes unobserved in the night, leaving in his wake whole boxes of garbage, as well as cases of cans and bottles. Laws are becoming increasingly stringent but to little avail. What is threat of a $500 fine to these despoilers of the countryside that no law can catch, except in the rare instances when their brashness overcomes their natural cunning.

The scourge of the litterbugs will get worse each summer, judging by recent estimates that put the production of 12-ounce containers by 1982 at a possible 900 million gross Since a gross is 12 dozen, it is not hard to figure out what the landscape will look like in the summer of, say, 1985, if litterbugging continues uncurbed.

Across The Fence Row

Maybe if the "good old days" came back, we could find some fault with them, too.

* * *

The difficult is that which can be done immediately; the impossible usually takes a bit longer.

* * *

Wonder how long it will be until obsolete A bombs will be in our surplus stores?

* * *

Rufus: "How are you getting along with your arithmetic?"

Susan: "Well, I've learned to add up the oughts, but the figures still bother me."

Local Weather Forecast

(From the U. S. Weather Bureau at the Harrisburg State Airport)

The five-day forecast for the period Saturday through next Wednesday calls for temperatures to average below normal with daytime highs in the mid 70's and over-night lows in the 50's in the north and middle 50's in the south. It is to be cooler Saturday thru Monday and milder Tuesday and Wednesday

Precipitation may total greater than ½ inch in most sections. Showers ending over the southern portion early Saturday and general showers developing over the region Tuesday or Wednesday.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY LAWRENCE W ALTHOUSE

TO ME

Lesson for June 22, 1969

Background Scripture Deuteronomy 5 1 6 30 15 20, Psalms 19 7-11; 119 9 16, 102 105, 2 Timothy 1 13,14

Devotional Reading Psalms 19 7-14.

Roy L. Smith once remarked, "The proof of the inspiration of the Scriptures is their power to inspire." Thus, as we have already seen, the Bible is essential to the Church in its corporate worship and study. Through the scriptures God speaks to the Church.

Rev. Althouse

It is also true, however, that, through the scriptures, God speaks, not only to his Church, but to individual Christians as well. It is a resource for the fellowship; but it is also a personal resource too. God uses it to give me a message that is quite personal.

A kinship

For one thing, the Bible may become very personal as we study and relate to ourselves the lives and experiences of various Bible characters. We may find a kinship with Jeremiah, for example, when we learn that, instead of responding eagerly to God's call, he reacted timidly, protesting that he was too young to take upon himself the task to which God had called him. "Ah, Lord God! Behold, I do not know how to speak, for I am only a youth" (Jeremiah 1:6). This may sound alarmingly similar to our own response to God's challenges to us.

Perhaps it may be Job who seems to speak personally to us. We may have had experiences that have prompted us to cry out in terms not too different from his: "God has cast me into the mire, and I have become like dust and ashes. I cry to thee and thou dost not answer me; I stand, and thou dost not heed me" (Job 30:19, 20). As we study his remarkable story and try to understand his situation, perhaps we can begin to understand better our own.

A parallel

The story of Jonah may also prove to be for us a very personal message. As we ponder the meaning of this book, we may see a parallel between this ancient man and ourselves. As he tried to escape God and failed perhaps we too have found that running away from his challenge is no answer. As we recognize Jonah's vindictiveness against the people of Nineveh, perhaps we recognize in ourselves a touch of the same. We too may enjoy more the message of condemnation than that of redemption.

Others may identify personally with Simon Peter. In his bumbling impulsiveness they may see themselves. When they study and consider his three-fold denial of our Lord and his later rise to leadership, perhaps they can find in this the comfort to face and salvage their own failures. As they witness how Peter's mind had to be radically changed so that he could put aside his prejudices and consent to baptise Cornelius the Gentile, they may be less threatened to perform the personal changes he calls upon them to make.

Especially for us

Secondly, God's message may become very personal for us, not only as we consider Bible characters, but its themes and ideas as well. When, for example, we stumble through some dark period of our lives, his assurance, "Even though I walk through the valley of the shadow of death, I fear no evil," may seem to us a very personal word of comfort.

The words of Psalm 8 may speak specifically to our own sense of wonder and awe: "When I look at thy heavens, the work of thy fingers, the moon and the stars which thou hast established; what is man that thou art mindful of him, and the son of man that thou dost care for him?" (8:3,4). It may seem that John's words were written especially for us: "If we say we have no sin, we deceive ourselves, and the truth is not in us" (1 John 1:8).

The wonder of it all: that these many and diverse books, written by so many different men in so many different times and places and circumstances, should still speak so personally to me!

To Eradicate Rats

The only good kind of a rat is a dead rat and I'd like to encourage everyone to feel the same way They can be the carrier of numerous diseases, will destroy or damage all kinds of feed and food, and are a menace to everyone All known dens and nests of rats should be located and the rats poisoned, trapped, or killed by fumigation If rats are allowed to populate freely during the summer, they will come into buildings and do more damage this fall & winter Be persistent until all rats are exterminated

To Sell Cattle At Light Weights

Fat cattle prices have been favorable for the last several months Farmers can help retain this price level by selling their cattle between 1050 and 1150 pounds, or when they reach the choice grade Heavier cattle may tend to depress prices and are less efficient to feed Feeders now have an opportunity to help determine the price of beef.

To Buy Machinery Conservatively

Many farmers are carrying a very high investment in farm machinery, on many farms the machinery is adequate to farm twice the acreage This is difficult situation to solve because the shortage of labor forces many farmers into greater machinery investment One solution might be the greater use of custom operators to do the work, and the second one would be the purchase of more second-hand machinery Used machinery reduces the high first cost and the initial high depreciation Contact your local farm machinery dealer and talk it over.

4-H Club Activities

PENN WILLOWS
by Eric Eshleman

The regular monthly meeting of the Penn Willows 4-H Club was held Friday, June 13 at the Pequea Township Elementary School The meeting was opened with a baseball game. The Penn Willows Club played the Garden Spot Club. Victory went to the Penn Willows. The program was on "Safety" Mr. Jay Irwin from the extension office showed a film on farm safety. The meeting was adjourned by the president, Tim Brenerisen. The next meeting will be held at Safe Harbor park on July 11, 1969

Clashing Thimbles

The second meeting of the Clashing Thimbles Sewing Club was called to order on June 18 at the Penn Manor Junior High School by the President, Betty Jane Bailey.

After the business meeting, the first year girls learned how to thread and operate the machines, while the advanced girls fitted their patterns and straightened their material

A 4-H cookie sale, sponsored by the Leaders' Council, is now underway The cookies to be sold were distributed after the meeting.

Hay Prices

There was little movement of new hay and no old hay being moved in trading in Lancaster County and six other southeastern counties last week All hay was number 2 or better

At the Green Dragon, Ephrata, a total of 13 loads of hay, 11 loads of straw and three loads of corn were sold

Prices per ton were one load alfalfa, $32 50, timothy, $20 00-$30 00, mixed hay, $20 00 $25 00; straw, $20 00 $23 00, and ear corn $39 50 $45 00

Regulations Governing Filled Milk Are Recommended

Filled milk could soon come under the same type of regulations governing whole milk products as the result of a recommendation of the U S Department of Agriculture at a hearing in Memphis, Tenn

The USDA recommended this week that federal milk marketing orders be amended to provide specific methods for regulating the dairy ingredients of filled milk.

Filled milk is a beverage containing either fresh liquid skim milk or skim milk reconstituted from nonfat dry milk, to which vegetable fat or oil is added to replace the natural butterfat

According to USDA officials, filled milk has been priced as a fluid milk product under most federal milk orders since it appeared on the market two years ago

The filled milk has not been specifically mentioned in the orders in the fluid milk definitions and officials believe more detailed provisions are needed.

The decision, in recommending that orders specifically apply to dairy ingredients in filled milk, defines filled milk as a product which is a combination of skim milk and nonmilk fat and resembles other fluid milk products Only products which contain less than 6 per cent nonmilk fat are included.

The effect of the decision would be that the present Class I (fluid milk) would be maintained for all producer milk in the various fluid uses USDA officials said that in most markets, the decision would not change the cost to handlers for the milk ingredients that go into filled milk

For filled milk made with skim milk derived from other than producer sources (dry milk, for example) and sold in a marketing area, a payment into the producer-settlement fund equal to the difference between the Class I and surplus prices would be required The payments would apply to products made in either a pool plant or a non-pool plant

Producer-handlers who serve markets where some exemptions are maintained even though supplemental fluid milk products are purchased from regulated plants would have to include filled milk in the total amount purchased They would not maintain the exemption if reconstituted skim milk or unregulate dmilk is used for his sales of filled milk or other fluid milk products.

The pool plant provisions would be changed so that the sale of filled milk would not be a basis for a plant's becoming eligible for pooling

● Pullet Chicks

(Continued from Page 1)

mestic plus exports) were reported at 4,593,000 compared with 3,621,000 a year earlier Domestic placements of pullet chicks during January through May were 16,882,000 an increase of 10 percent from the same period last year

The placement data include pullet chicks sold during the month, plus the number of pullet chicks expected from eggs sold during the preceding month The primary breeders included in this report account for a very large percentage of total supply of replacement pullets for broiler hatchery supply flocks Sales of replacement pullets by these breeders provide an indication of the potential number of pullets available for addition to hatchery egg supply flocks several months before the pullets will actually move into the flocks

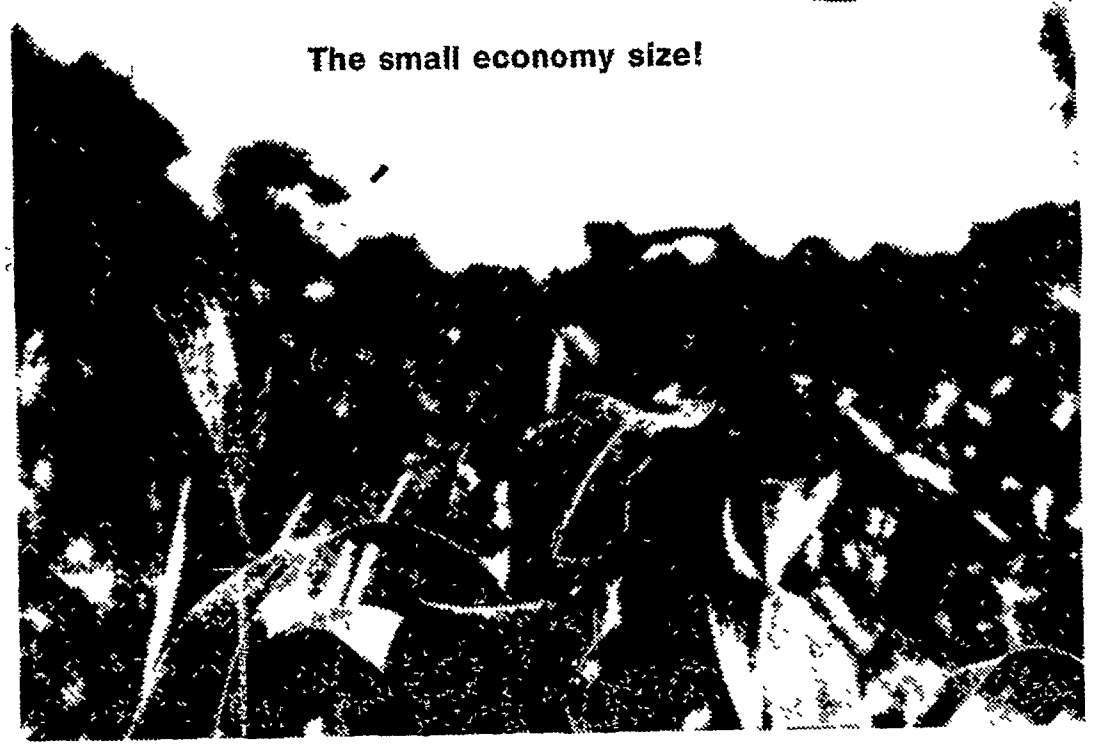
The small economy size!



A drop of Banvel controls broadleaf weeds. Cost? A drop in the bucket.

Just small amounts of Banvel per acre do the job without making corn brittle. It's a liquid and can be sprayed postemergence up to the time corn is 36 inches high *or* ten days before tassel emergence, whichever comes first. Banvel penetrates broadleaf weeds that other herbicides miss. It translocates throughout the weed... tough Canada thistle, pigweeds, smartweeds, velvetleaf, lambsquarters, spurge and others are all controlled Corn is freed of weeds. Order Banvel herbicide today.

Agrindustry Careers Set For FFA Week

Exhibits and discussions of occupational opportunities in agricultural industry will be a new feature of the annual Future Farmers of America Activities Week July 1 to 3 at The Pennsylvania State University Attracting some 1,400 FFA members and teachers, the event will include the annual business meeting of the State FFA Association

By including presentations of state and federal agencies and a commercial industry, the training will give a broad look at the total concept of agriculture, states Norman K. Hoover, in charge of arrangements for the department of agricultural education at Penn State.

Interested students will be invited to meet with representatives of the U. S. Soil Conservation Service, the Pennsylvania Department of Agriculture, the State Game Commission, the Pennsylvania Department of Forests and Waters, and the New Holland Machine Company Another group of agencies and commercial industries will be presented next year, Dr. Hoover points out Tours and demonstrations by plant and animal science personnel in the College of Agricultrue will be featured as in previous years.

Eighteen state FFA contests will be featured this year, three more than any previous year The new contests deal with floriculture, farm machinery adjustment and power, and operation of the small gasoline engine

Glenn S Weber of R. D. 2, Mohnton, regional vice president of the FFA's North Atlantic Region, will speak at an assembly the night of July 2 in Schwab Auditorium. Weber is vice president for 12 northeastern states.

Films of Penn State's undefeated 1968 football season will be shown the night of July 1 at the opening assembly in Schwab Auditorium, presented by Sever J. Toretti, assistant director of athletics. A final assembly will be held July 3 at 10 a m in Schwab Auditorium to present awards.

● Summer Egg

(Continued from Page 1)

"If the increase in consumer income slows as expected later in the year," USDA added, "less growth in demand for broilers would occur. This would put prices in the second half under pressure if the expected increase in supplies of red meat and broilers materializes."

For turkeys, USDA said indications are for "moderately higher" prices than a year earlier during the main marketing season this year.

The report noted that turkey marketing during the first half of 1969 may turn out to be 10 to 12 pc. below last year.

This decline, coupled with a relatively large movement into consumption channels, has made cold storage holdings of turkey less of a price depressing factor, USDA said.

Stevens Mill Wins Contest

The management of Stevens Feed Mill, Inc, Stevens and Leola, Pa., recently won a tonnage contest conducted by Ful-O-Pep Feeds.

The award was for increased tonnage during a nine month period.

In Ful-O-Pep's opinion Stevens Feed Mill made a significant effort to expand their business, better merchandise their products and more efficiently service the growing needs of agribusiness in this area.

Stevens Feed Mill at Leola is celebrating their first anniversary at that location this month.

Cholesterol Issue Not Resolved

In the battle over the cholesterol issue the "enemy" is growing stronger every year, reports Dr. L. A. Wilhelm, president of Poultry and Egg National Board.

In the 20 years of its existence, the American Heart Association has had $150 million at its disposal, according to its recently released annual report. Its budget for last year was nearly $40 million compared to less than $300,000 for PENB.

This means that PENB was outnumbered 133 to 1 in trying to counter AHA's publicity, which places eggs and other foods containing animal fats in a villainous role. Such odds would cause the most courageous military man to quake in his boots. The picture for the current year is even gloomier. At the beginning of the year AHA had $50 million on hand. Unless PENB has a similar increase in funds, that makes for odds of 166 to 1.

AHA spent over $4 million last year just for public health education. It took only a small fraction of that to produce a 13-minute film, "Eat To Your Heart's Content." The film, which was released last winter, included such advice as "eggs aren't what they're cracked up to be. Do not eat more than three (whole) eggs a week."

Two decades ago when AHA was formed its primary purpose was to do cardiovascular research There was little emphasis on publicity. Today only about one-third of each dollar goes into research. An almost equal amount goes into fund-raising and administration. In the remaining third there is plenty of money available for anti-animal fat publicity.

AHA's growing budget for publicity has been accompanied by a change in policy Originally AHA was concerned only with altering the diets of those persons actually suffering from coronary disease, those who had suffered from it and those who might be especially prone to it. Now it is recommending a diet low in animal fats for ALL citizens, healthy ones included. This runs counter to the American Medical Association's current recommendation that well-balanced diets include dairy products and meats or other high protein foods, such as eggs, regularly.

If the egg industry and other animal food industries (dairy, meats, etc) ever are to effectively counter the information put out by the AHA, there is going to have to be a much bigger budget for weapons, says Dr. Wilhelm. A slingshot won't do!

FLOWER DOUBLE BEAUTY

Your flower garden can give you double beauty if you plan early in the season to dry some of the blooms Dried flowers, arranged into a beautiful bouquet, can add color and charm to your home all winter.

In colonial days the art of drying flowers was popular. Now, there has been a revival of this interest by many homemakers and garden-club members.

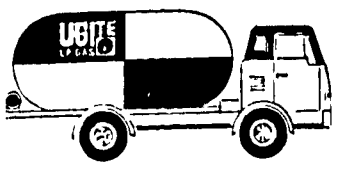
Starting to select and dry materials early in the season is important if you want a variety of forms and colors to choose from when fall comes If you are interested in drying flowers, you'll be interested in a correspondence course offered by The Pennsylvania State University.

You'll want to know which flowers to choose from drying, at what stage of maturity to pick each one and the best preserving material to use As you select and preserve materials, remember that line, form, pattern, texture, and a pleasing color scheme are just as essential as for arrangements made with fresh plant material

Other lessons in the course discuss design, containers, color, and corsage making You'll learn which garden flowers to use, how to wire them, and how to make bows for your corsages.

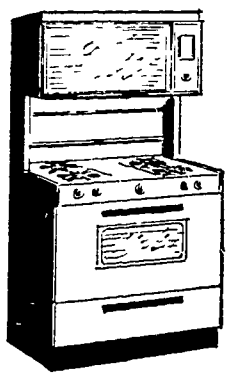
If you're interested in making each of your flower arrangements a conversation piece, send $2 00 to Flower Arrangements, 202 Agricultural Education Building, University Park, Pennsylvania 16802 Check or money order should be made payable to The Pennsylvania State University.

Ugite sells gas



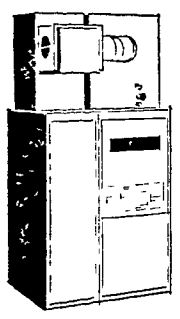
For the best in gas service, call Ugite and get all the pleasure and convenience of gas cooking, clothes drying, water heating, barbecuing and home heating.

Ugite sells appliances



Buy from the people who know gas best. You'll get better installation, more dependable service, and the know-how that gets the most from your appliance at lowest cost. We offer a full line of ranges, water heaters, room heaters, clothes dryers, gas lights, and gas grills.

Ugite sells central heat and air conditioning



With a central heating-air conditioning system from Ugite, you get *TOTAL* home comfort. Air is warmed, filtered, and humidified for the cleanest winter comfort you can buy. In summer, air is cooled, filtered and dried for that crisp coolness missing in so many systems. Our free Total Home Comfort Survey will tell you what system is best for your home at the lowest cost.

If it's gas, it's best if it's from UGITE LP-GAS

FARM WOMEN NEWS

SOCIETY 7

Society of Farm Women 7 met June 14 at the Landis Home Retirement Center, Lititz R3, with Mrs Emma Denlinger as host

The group voted to give $10 to the Conestoga Valley Association. A food stand is planned for the Flea Market at Paradise Memorial Park on July 5

The Society will make cookies for the USO Ditty bags will be made for the Red Cross to distribute to servicemen in Vietnam during the Christmas holidays

The program was a piano solo by Cynthia Denlinger A reading was given by Mrs Gertrude Lefever Speaker was Mrs Glenn Eshleman She presented slides around the theme "To God Be The Glory"

The next meeting will be a family picnic on July 19 at Paradise Memorial Park.

SOCIETY 29

Mrs Paul Gerber, Elizabethtown, a teacher of first grade children in the Elizabethtown school, presented "Child Talk" to members of Society of Farm Women 29 June 16 at the home of Mrs Stanley Newcomer, Mount Joy R1 Assisting was Mrs Allen Esbenshade.

The opening was conducted by Mrs Gerald Ruhl Mrs Ronald Oberi, president, informed the group of her new address She lives at Mount Joy R2. A white elephant sale is planned for Aug. 8 when each member is requested to bring at least one item for sale

A family picnic is planned at the farm home of Mr. and Mrs. Jack Garner, Mount Joy R1, on July 20 at 12:15 p m. Mrs Clayton Ranck is food chairman

SOCIETY 14

Society of Farm Women 14 entertained members of Society 17 and County officers at a buffet luncheon in the West Willow Fire Hall

Devotions were conducted by Mrs. Charles Leaman A special feature of the day was a tribute to fathers.

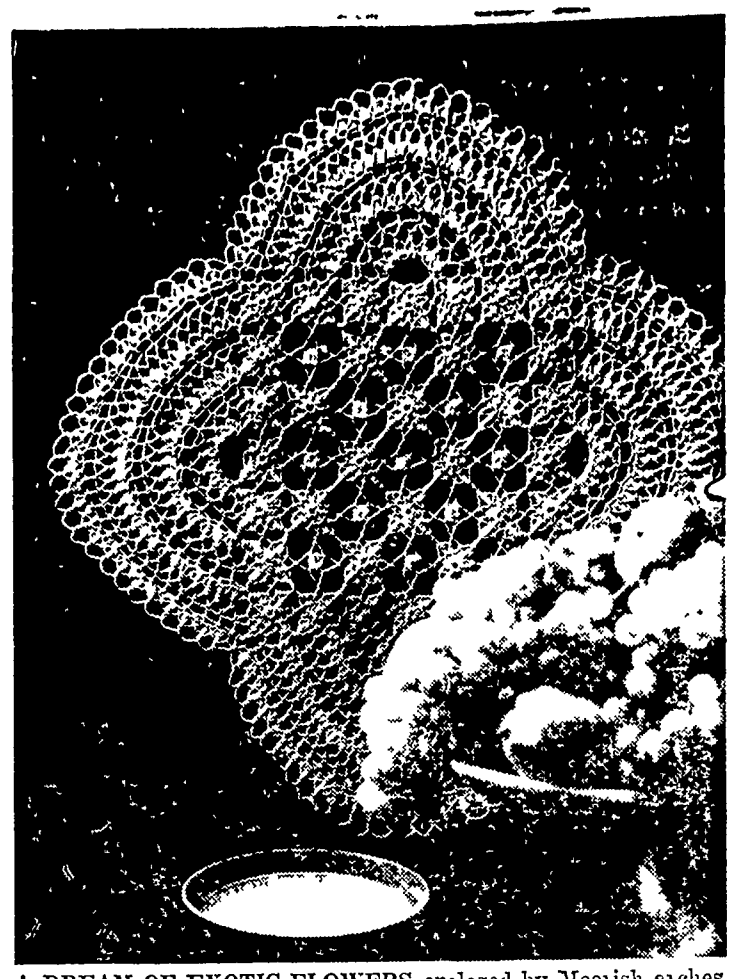
Mrs. C. Parker Wright showed slides and spoke of the Primitive Indians of Mexico The Weber Duo presented an original skit "Talking It Over" in Pennsylvania Dutch dialect.

Hostesses for the event were Mrs Robert Esbenshade, Mrs Melvin Denlinger, Mrs J Paul Hostetter, Mrs Raymond Barge, Mrs Charles Meloy, Mrs John Hershey, Mrs. Charles Leaman and Miss Elsie Metzler

The next meeting will be the annual family picnic to be held at 6 30 p m on July 16 in the William S Tinney Memorial Pavilion Each member will bring one or two covered dishes, according to the number of guests she will bring Mrs. Donald Cairns will entertain the group with "Family Fun Unlimited."

Pennsylvania Broiler Placements Up 8%

Placements of broiler chicks in the Commonwealth during the week ending June 14 was 927,000 The placements were 8% above the same week a year earlier but 8% below the previous week Average placements during the past 10 weeks were 9% above a year earlier. **Settings** for broiler chicks were 1,719,000 —4% below the previous week but 10% above the comparable period a year earlier The current 3-week total of eggs set is 7% above the same period a year ago. **Inshipments** of boiler-type chicks during the past 10 weeks averaged 44,000—three times the comparable period a year ago. **Outshipments** averaged 340,000 during the past 10 weeks, 28% higher than a year earlier



A DREAM OF EXOTIC FLOWERS enclosed by Moorish arches. The sultan's garden has been re-created in lace. This doily is crocheted in Arabesque flourishes. It measures 17 inches at the widest point. Free instructions for the "sultan's garden" doily are available by sending a self-addressed, stamped envelope to the Needlework Editor of this newspaper along with your request for Leaflet A 519.

SOLANCO FFA NEWS

The June meeting of the Solanco FFA Chapter was held in the school Ag room John McSparren gave a talk about further education after graduation He is attending the University of Maryland

The officers of the Solanco FFA were initiated at this meeting They are· President, Matthew Young; Vice-presidents, Joe Linton, Tom Aaron, Dale Bollinger; Secretary, Lloyd Welk, Treasurer, Ken Dearolf, Reporter, Leroy Welk, Sentinel, Herb Kreider; Chaplain, Scott Kreider; Parliamentarian, Glenn Kreider; Photographer, Mark Young

The following assistant officers were also elected at this meeting Assistant Secretary, Charles Smith, Asst Treasurer, Robert Young, Asst Sentinel, Carl D. Kreider, Asst Reporter, Roger Campbell, Asst Parliamentarian, Scott Mull, Asst Chaplain Herb Hess.

The chapter sweetheart for 1970 is Cindy Baughman Miss Baughman's school activities are cheerleading, girl's basketball, gym leaders, and FHA. She writes news articles for **The Quill,** the Solanco School newspaper.

Cindy is also a committee chairman for the cabinet of the Church of the Brethren Youth Fellowship

During the summer she is a life guard at the Nickel Mines Swimming Pool.

Self-Propelled Bunk Feeder

Out performs all others. Faster, safer, less expensive too. A one h.p. motor propells a 150 ft. feeder. Delivers 1,200 pounds of corn silage per minute. No feed separation. Put it outside or inside — small lots or large. Ask us for full details.

Outdoor Cooking

The season for outdoor cooking is at hand and we notice many folks enjoying this summer-time practice Charcoal is the common fuel but needs to be handled with care in order to prevent serious burns Charcoal lighter fluid is available and is the material to use Do not use fuel oil, kerosene, or gasoline; they're not only dangerous but may produce a smoke that gives an oily taste to the food. After the charcoal has been soaked with the lighter fluid, allow several minutes for it to soak into the material, then light it Let it burn for 15 to 20 minutes before applying the food; don't expect to see flames, just grey ash that develops around the charcoal pieces When the charcoal is about two thirds covered with this grey ash, then it is ready for cooking Respect the hot charcoal, don't let the absence of flame fool you; handle with tongs because serious burns may result

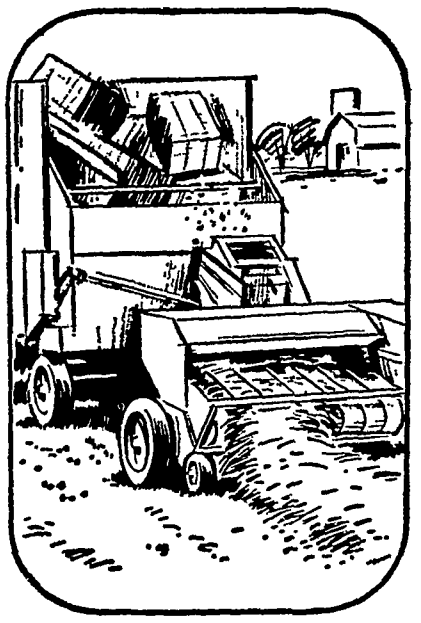
The Satisfaction That Comes From Doing A Good Job Of Farming



It's a great feeling to know that you are the master of your farmlands . . . that when you treat your soil right, it will treat you right. Liming is one of the most important factors in keeping your soil in the highest productive range. By raising the pH from a level below 6.0 to 6.5 or higher, you can expect to harvest .8 more tons of alfalfa per acre, with similar increases for all other forage and cash crops.

AGWAY

PRIME

EVERY TIME

That's the kind of veal you can produce on the Agway-Provimi program

The growing demand for quality veal represents a new and exciting opportunity for Agway members to make money. Raising vealers is an ideal program that will fit into most any dairy and crop farm operation. Here's why:

- ☐ Rearing veal calves requires relatively little time and labor
- ☐ The work is light
- ☐ The investment is modest.
- ☐ The need for equipment is limited.
- ☐ With good housing and management, risk is relatively low.
- ☐ And with the Agway-Provimi Program you will be assured of premium-quality veal and, with it, premium prices.

PROVIMI . . . the symbol of top quality in the veal-producing industry

Provimi has been known throughout the world as the way-out-in-front leader in the veal-producing industry for twenty years. Today, Provimi veal is known and accepted as prime veal, and the demand far exceeds the current supply. When available, Provimi veal gains top prices for the producer.

That is why your cooperative now offers you the Provimi line—the tried and tested program, the fine feeds, and veal marketing know-how. When you use the Agway-Provimi Program and feeds, you also get needed assistance in the marketing of the prime veal that you produce..

SECOND SECTION

Egg Production Up Eight Percent In May

HARRISBURG — Pennsylvania's laying flock produced an estimated 291 million eggs in May, up 3 percent from a year ago. The increase was attributed to a 6 percent increase in flock size from May, 1968.

Average price received by farms for all eggs declined 6 cents from April, but was 2 cents above a year ago. However, this was the second month to show a sizeable decrease in egg price, according to the Pennsylvania Crop Reporting Service.

Thin Vine Crops

Vine crops in the vegetable garden do best if thinned to 2 or 3 plants in the hill or to stand 12 to 15 inches apart in the row, reminds Robert F. Fletcher, extension vegetable specialist at The Pennsylvania State University Pinch or cut off plants to be discarded.

Red Rose CATTLE FEEDS

If its "better profit" you want — these are the feeds to use!

USDA Reports Decline In Farm Mortgage Loan Volume

Farmers borrowed less mortgage money from major lending groups in 1968 than in 1967, and unless current high interest rates and competition from urban borrowers relax the downtrend will continue this year, according to a report released recently by the U.S. Department of Agriculture.

Volume of new farm mortgage money loaned by 19 life insurance firms, Federal land banks, and the Farmers Home Administration dipped 8 percent in 1968 to $1.58 billion and was 21 percent under the high mark of 1965, USDA's Economic Research Service stated.

Interest rates for Federal land banks and life insurance farm mortgage loans climbed higher in the last half of 1968 and reached an all time peak by year's end Most of the drop in loan volume in 1968 came in the second half of the year. The $618 million loaned from July through December 1968 was 27 percent below the year earlier period, the report noted.

The total of farm mortgage loans outstanding December 31, 1968 was $12 4 billion Although this amount was about 6 percent above a year earlier, it was only 2 percent more than six months before. Rising interest rates and urban demand for money had reduced borrowing by farmers.

The report indicates the slackening in the volume of new farm mortgage loans is expected to continue through the first half of this year. Advance commitments by life insurance companies in the second half of 1968 were for loans of $304 million, 37 percent below allocations in the comparable 1967 period and eqaul to the amount in the tight money period of late 1966.

In the last half of 1968, life insurance firm loans averaged $69,040, a 26 percent rise over that period of 1967. Average loans made by land banks for second half 1968 were $25,410, down about 6 percent

Summer Heat Hard On Farm Equipment

While winter weather is damaging, summer sun and heat also shortens the life of farm equipment, say extension agricultural engineers at The Pennsylvania State University. As equipment becomes more "sophisticated" and expensive, it pays even more to keep it under cover when not in use.

The width of Africa is about the same as its length

Milk Production Up One Percent In May

HARRISBURG—Milk production on Pennsylvania farms totaled 664 million pounds in May, an increase of one percent from a year earlier, but down 4 percent from May, 1967.

The Pennsylvania Crop Reporting Service estimated the number of cows in milking herds at 726,000 or 3,000 below a year earlier Production per cow during May at 915 pounds showed the usual seasonal advance, but was up 15 pounds from the same month in 1963.

The average price received for milk during May was estimated at $5 85 per hundredweight, 31 cents above a year earlier

Consumption Of Pork At Highest Point Since 1959

Pork consumption in 1968, at 63 8 pounds per person in the United States, was at its highest point since 1959, according to David E Noller, Sigourney, Iowa, retiring Chairman of the Pork Industry Committee of the National Live Stock and Meat Board The Committee met Monday in conjunction with the 46th Annual Meeting of the Meat Board

In an effort to keep consumption per person moving upward in response to strong consumer demand, the Pork Industry Committee, in cooperation with the

WASHINGTON REPORT

Congressman Edwin D. Eshleman

16th District—Pennsylvania

When President Truman gave the go ahead to the development of the H-bomb in 1950, the basis was laid for the nuclear stalemate which has held through the present day Because this policy was successful in maintaining national and world security—an achievement recognized somewhat favorably by even the worst critics of military policy today—it might be hard to imagine that an effective attack could have been mounted against President Trumans original decision to build the super-bomb Yet rather bitter opposition was voiced to Truman's determination and, significantly, the criticism was centered on points that should be quite familiar to those who have followed the anti-ABM position recently

The Congressional opponents of developing a hydrogen bomb almost 20 years ago principally talked about a certain extension of the arms race Sound familiar? One Republican Senator suggested that the United States should formally notify the United Nations that we would be ready to stop work on the new weapon as soon as Russia permitted effective control of atomic energy A Democratic Senator proposed an alternative to the super-bomb—a $10 billion peace offensive to end the "truly terrible arms race" A Republican Congressman said that President Truman had 'muffed" an opportunity to stop the world's "mad' armaments race

From within the scientific community came an attack centered on reasoning of a different kind Some scientists claimed that the H-bomb was unworkable Sound familiar? One scientist's assessment was that the "state of knowledge" was such that the "practical utility or even the workability" of a hydrogen bomb was "extremely questionable" Another said that even if a thermonuclear weapon could be built, it would be of "doubtful military value" These opinions and some like them led to a reasoning by the opposition that a huge expenditure of time and money might give no results at all, or results which were dangerously inadequate.

The strange comparisons between the anti-hydrogen bomb and the anti-ABM arguments should not go unnoticed We may well be on the brink of usheering in another new era of policy for national and world security. It would have been tragic if we had allowed opposition contentions to delay H-bomb development in 1950, and it might prove to be just as irresponsible to listen to basically the same arguements today against deploying Safeguard.

The American people, I am certain, are convinced that the right decision was made following the hydrogen bomb debate At that time we were even unsure of Russia's ability to build a comparable weapon, but our own sense of a need for providing protection for an uncertain future guided our choice. The approval of ABM should be guided by the same kind of perception, for the Soviet Union's intentions on this matter are not even a subject of question Russia has already deployed an ABM.

Frey Cow Over ½ Ton Fat In 358 Days

Battleboro, Vt—The 2,721st yearly production record exceeding a half ton of butterfat has been completed by a Registered Holstein cow, Fultonway Ivanhoe Bates 5164618 (VG) owned by J Mowery Frey & Son, Fultonway Farms, Lancaster

The Pennsylvania Holstein's official record of production totalled 21 910 lbs of Milk and 1,002 lbs of butterfat in 358 days She started her lactation at the age of 7 years and 4 months and was milked twice daily

Fultonway Ivanhoe Bates was bred in the Frey herd She was sired by Osborndale Ivanhoe 118 9870 (EX), a bull that has earned a Gold Medal Sire recognition

Pennsylvania State University supervised the weighing and sample testing of her production in cooperation with the Dairy Herd Improvement Registry program of the Holstein Friesian Association of America

All but three of Chile's 24 states form on the Pacific

Lifetime Records By Area Holsteins

Lifetime milk and butterfat production levels for Registered Holstein cows in this area have been announced by Holstein-Friesian Association of America The individual animals have been credited with career food production totals exceeding 100,000 lbs (46,500 quarts) of milk. The official testing program is sponsored by the Association and supervised by the state and local testing organizations.

Because of the high cost for herd replacements, cows that stay in the herd longer and achieve high lifetime production have proven to be more profitable The Holstein Association has over 32,200 cows on file that have attained the 50 ton production milestone.

Local Holstein breeders and their long-time producers reported by the organization include:

Red Rose Leader Arbelle 525-0024 (GP), 108,803 lbs of milk and 4,045 lbs of butterfat in 2,259 days She is owned by John W Eshelman & Sons, Red Rose Research Center, Lancaster

Trout Spring Hoe Wren 5077-221 (VG), 100,942 lbs of milk and 3,905 lbs. of butterfat in 2 503 days. She is owned by John E. Kreider, Lancaster.

Try A Classified — It Pays

Start raising more and better Calves

the Easy NURS-ETTE way

No more carrying pails of warm water or hand mixing milk replacer. Just fill the hopper of the NURS-ETTE with milk replacer and the NURS ETTE will mix milk replacer and warm water and keep it warm until calf nurses the mix (approx 14 oz)

Then it will mix a fresh batch of water and replacer.

Peach Crop In State Largest Since 1960

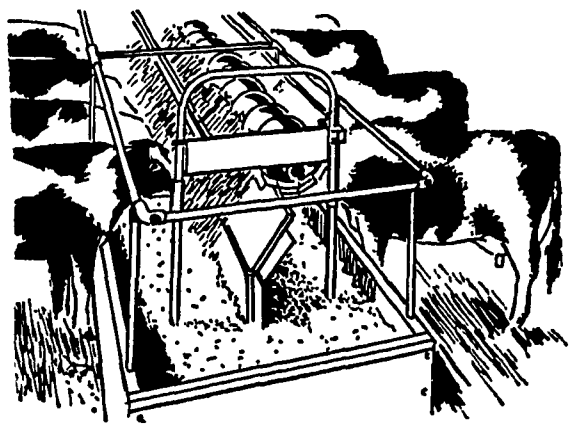
HARRISBURG — The state's peach crop this year may be the largest since 1960, an estimated 120 million pounds. This forecast was made by the Pennsylvania Crop Reporting Service in its first survey of tree fruit production for the current season made earlier this month.

The Service estimated that the peach production, if realized, will be 13 percent more than last year. The pear crop is expected to total 3,200 tons, down 2 percent from the previous year.

Conditions of the sweet cherry crop indicate a 1,100-ton crop. Sour cherry growers in northern areas of the state, particularly in Erie County, have reported substantial damage from May frosts. First production estimate for the crop will be issued by PCRS on Monday.

First estimates of the state's apple crop will be made in early July. Conditions of the fruit is generally good with heavy sets much in evidence.

FEED FAST...ALL AT ONCE



Hinged side of Jamesway Fill-N-Feed grain or silage feeder pulls away from J-trough and auger automatically to dump all feed fast ...all at once without feed separation. All cattle get the same quality feed. Eliminates injuries from crowding, shoving.

Choice of manual or automatic feeder, timer or sail switch control. Feeder features gear head gate drive and galvanized steel safety cover.

10% more milk within 30 days...

...without adding a cow to your herd and on the same amount of grain and roughage you're now feeding

Ful-O-Pep Cattle-izer Dairy feed helps your cows make better use of their entire ration — produce 10% more milk while maintaining body weight and butterfat test.

Rumen digestion changed

The dairy cow's rumen breaks the ration down into organic acids She gets most of her energy from the volatile fatty acids — acetic acid, propionic acid, and butyric acid.

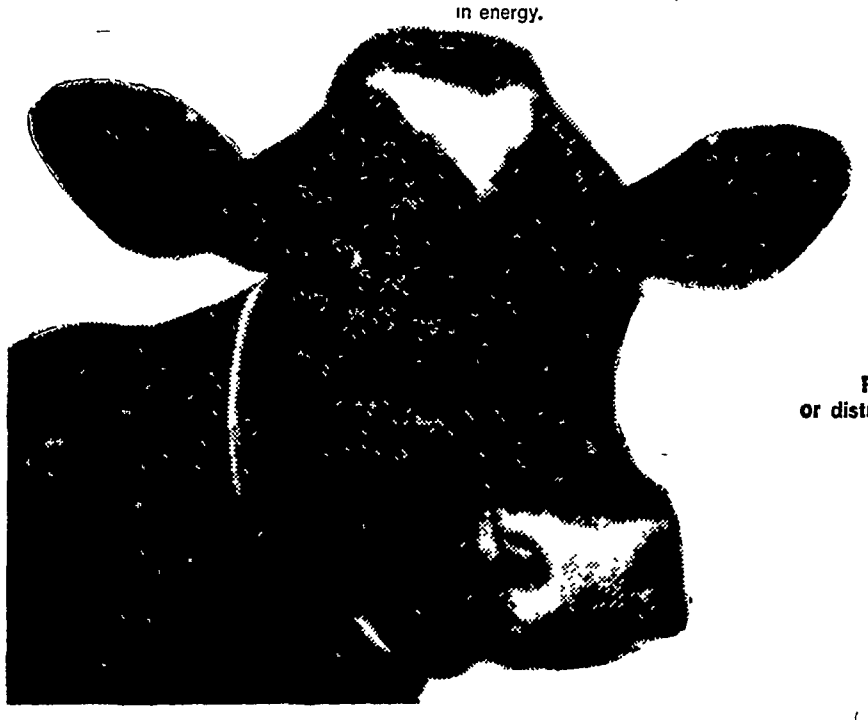
Ful-O-Pep scientists learned how to increase production of these acids and to shift more of the production into high-energy propionic acid This meant a 20% increase in energy.

Cattle-izer feed boosts milk production

In test after test, cows on Ful-O-Pep Cattle-izer feed increased better than 10% in milk production over control cows. In some cases the improvement showed up within a week, and within a month in all cases.

Butterfat and body weight maintained

Cows on Cattle-izer maintained their butterfat tests and kept their body weight as well or better than control cows.



See your Ful-O-Pep Dealer or district representative now for full details.

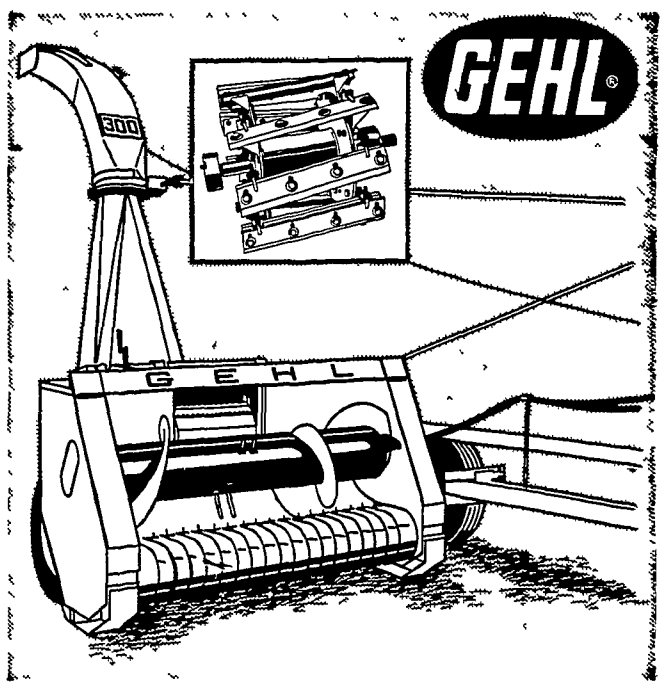
Home Gardners

Many home gardeners are interested in a general purpose spray that can be used on many flowers and vegetables for the control of common insects and diseases The spray schedules call for so many materials that it will require a big inventory to meet all recommendations In addition, some materials such as DDT, dieldrin, aldrin, and chlordane are being discouraged for the home vegetable gardener; also, materials such as parathion and guthion are highly toxic and should not be used without special equipment We suggest a mixture such as malathion or diazion with a fungicide such as maneb or captan to be used on all flower and vegetable crops.

TRADITIONALLY NEW... FIELD TO FEEDLOT



NOW... A CYLINDER CHOPPER that merits the Gehl name!

A cylinder cutterhead is the heart of this new Gehl "300" chopper. Nine knives whirl at 1000 RPM to cut and throw material with each razor-sharp slice. Standard tungsten-carbide faced knives and cutterbar . . . built-in knife sharpener. No feeder apron. Crop attachments pivot with the feed-in mechanism — the opening is always perfectly aligned with feed rolls, providing steady, even bites to the knives. Three attachments available: hay pick-up, one-row, and a two-row that handles both wide and narrow rows.

HAY PICK-UP

- Full-width floating auger
- Retractable fingers

FOR THE
FARM WIFE AND FAMILY

USE DAIRY PRODUCTS TO GOOD ADVANTAGE

by Mrs. Richard C. Spence

June is dairy month so it is quite appropriate that milk and dairy products are featured items on the list of plentiful foods in June Tomatoes and tomato products are also on the list and here are two recipes that use them both

TOMATO BISQUE

- **2 cups canned or cooked tomatoes**
- **½ teaspoon baking soda**
- **1½ tablespoons sugar**
- **1 teaspoon salt**
- **1½ tablespoons butter or margarine**
- **1½ tablespoons flour**
- **3½ cups whole milk**
- **¼ teaspoon pepper**
- **1 tablespoon finely chopped parsley**

Mash tomatoes with a fork to break up large pieces, then simmer 15 to 20 minutes Stir in baking soda, sugar, and salt; blend well Melt fat in a 2 quart saucepan Blend in flour Stir in 1½ cups milk Cook over moderate heat, stirring constantly until mixture thickens Stir in tomato mixture, remaining milk, pepper, and parsley Heat over low heat just until simmering Serve with toasted cheese sandwiches, celery and carrot sticks Makes 6 servings of 1 cup each and about 150 calories per serving

SWISS STEAK WITH CHEESE

- **1½ pounds boneless beef round steak, ¾ inch thick**
- **¼ cup flour**
- **1 teaspoon salt**
- **1 cup water**
- **¾ teaspoon worcestershire sauce**
- **⅓ cup sharp cheddar cheese, shredded**
- **2 tablespoons chopped onion**
- **2 cups tomatoes, cooked or canned**
- **½ cup chopped celery**
- **½ cup shredded carrots**

Trim excess fat from meat Heat trimmings in a large fry pan to get enough drippings to just cover bottom of pan. Discard trimmings Cut meat into 6 equal servings Mix flour and salt Pound flour into meat; set aside remaining flour. Brown meat in drippings.

Place meat in a 1½ quart casserole Preheat oven to 325 degrees Blend remaining flour with drippings in fry pan Add water slowly, stirring constantly. Heat mixture, stirring constantly, until slightly thickened Add Worcestershire sauce, onion, tomatoes, celery, and carrots.

Pour mixture over meat Bake, covered, about 2 hours Uncover and bake 1 hour longer or until meat is tender. Sprinkle cheese over meat Return to oven for about 3 minutes, or just until cheese melts

As a variation, use 6 thin slices of Mozzarella instead of shredded cheddar cheese. Serve with brussels sprouts, pineapple and banana salad and a pudding dessert Makes 6 servings, about 220 calories per serving

CHEESE TUNA RING

- **1 tablespoon (1 envelope) unflavored gelatin**
- **1 cup milk**
- **2 cups cottage cheese**
- **½ cup crumbled Blue cheese**
- **1 can (6½ ounces) chunk-style tuna, drained and broken into small pieces**
- **½ cup chopped celery**
- **¼ cup chopped carrot**
- **¼ cup chopped green pepper**
- **2 tablespoons finely chopped onion**
- **1 teaspoon Worcestershire sauce**
- **½ cup dairy sour cream**

In a saucepan sprinkle gelatin on milk to soften Place over low heat, stirring constantly, until almost smooth In a bowl combine gelatin mixture, cheeses, tuna, celery, carrot, green pepper, onion, worcestershire sauce and sour cream. Divide into 8 individual salad molds, 6-ounces each Chill until firm Makes 8 servings

* * * *

BONANZA CHEESEBURGERS

Hamburgers:

- **1 pound ground beef**
- **½ cup rolled oats, quick or old fashioned, uncooked**
- **¼ cup chili sauce**
- **2 tablespoons milk**
- **2 teaspoons instant minced onion**
- **2 teaspoons Worcestershire sauce**

Filling:

- **½ cup grated Cheddar cheese**
- **1 tablespoon mayonnaise**
- **½ teaspoon seasoned salt**
- **½ teaspoon Worcestershire sauce**
- **¼ teaspoon prepared mustard**

For hamburgers, combine all ingredients thoroughly Shape to form 12 thin patties For filling combine all ingredients thoroughly Spread about 1½ teaspoonfuls filling on center of six patties. Cover with remaining patties, pinch edges together to seal Cook over hot coals or in broiler about 4 inches from source f heat Cook about 5 minutes Turn and cook about 5 minutes longer Serve on toasted buns Makes 6 cheeseburgers

RICE WITH CHICKEN AND CHEESE

- **1 onion**
- **1 tablespoon fat or oil**
- **3 cups water or chicken broth**
- **1 cup uncooked rice**
- **1½ cups cut-up cooked chicken**
- **1 cup cut-up cheese**
- **Salt and pepper to taste**

Chop onion and cook in fat or oil until tender Add water or chicken broth Heat to boiling and add rice Lower heat, cover and cook 20 minutes Add chicken cheese, salt and pepper and cook over very low heat until cheese melts Makes 6 servings.

* * * *

ITALIAN-AMERICAN SNACK PIE

- **3-ounce package wafer sliced hard salami**
- **1 package (10) refrigerator biscuits, cut in half**
- **1 cup shredded Cheddar cheese**
- **2 tablespoons milk or cream**

(Continued from Page 16)

1 teaspoon prepared mustard
¼ to ½ teaspoon leaf oregano

Overlap salami, folded in half with rounded side up, and biscuits alternately around outside of 9-inch pie pan Use remaining biscuits and salami to make inner circle. Combine remaining ingredients and sprinkle mixture over top of salami-biscuit wheel. Bake in a hot oven (400 degrees) 12 to 15 minutes. Pull apart or cut into wedges to serve. 6 servings.

CHEESE MEAT LOAF

2 slices bread
⅓ cup milk
½ onion
2 eggs
¾ pound ground beef
½ cup cut-up cheese
1 teaspoon salt

Soak bread in milk. Chop onion. Beat eggs. Mix all ingredients well Shape into a loaf in a baking pan. Bake at 375 degrees for 1 hour.

Larger Pots For Plants Outdoors

Extension flower specialists at The Pennsylvania State University suggest when moving growing house plants outdoors, double-pot them in larger clay pots lined with peat moss. This gives them a topple resistant base and helps them to hold constant moisture during the summer months.

Women Can Use Leisure Time As An Opportunity

For most women, household automation is here. It is releasing them from drudgery and giving them some time to call their own. For some women, the newly found freedom brings boredom and frustration instead of pleasure, says Helen E. Bell, extension home management specialist of The Pennsylvania State University.

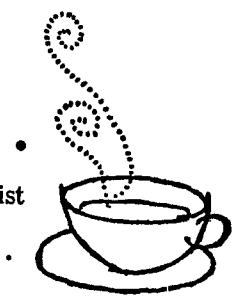
Leisure need not be a burden. Take time now to reorient yourself about leisure, she advises. Leisure can be an opportunity to develop strong interests in community affairs, to read, and to enjoy friends.

When a woman has been released from some of her household duties and there is time for other activities, why is there frustration? It's because many Americans still believe that work is what chiefly counts in our society. As time off from work and free time increases so does a womna's sense of guilt and uneasiness.

Everyone has some freedom from work. That's what leisure is, reminds Miss Bell. But the thought of leisure time is frightening to too many housewives and they fear boredom Perhaps without even knowing it, they avoid leisure.

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist



All About Olives

Americans eat about 85 million pounds of green olives each year.

THOMAS

Most of our domestic olive industry is in California.

Most of the crop is canned as ripe olives

There are basically two types of olives — canned ripe olives and green stuffed olives

To be edible, all olives must be treated to remove characteristic bitterness

A new process of making flavorsome olives consists of innoculating green olives with a pure culture of lactic acid-producing bacteria to cause fermentation This speeded-up modern way will simplify the fixing of the olive crop.

Look for olives in many forms — green black, stuffed, pitted, home cured, sliced, chopped, or in a salad pack.

Keep Grill Clean

If meat sticks to your outdoor grill, you'll find your problem solved if you keep the grill clean at all times Rub the grids with a piece of suet before placing the meat on the grill or apply a light application of fat to the hot grids. Meat doesn t stick as much to a clean grill as it does to one covered with burned residue

Outdoor Cooking Tip

Here's a rule that outdoor chefs and indoor cooks alike will want to remember. When broiling a steak, salt each side

A View From The Governor's Office

By Gov. Raymond P. Shafer

More and more I am coming to the belief that we are entering a new Age in this Nation in the area of State and local government—an age where the people regain their voice and their involvement.

And as part and parcel of this Age, there will be a new and strengthened alliance between the State House and City Hall.

All too often lately I have heard the phraseology of the State's **NEW** role in the Federal System This is not a new role but rather its traditional role which has been dormant.

There are those who speak of and work for a polarization of City-Federal relations. And in many instances, I must admit, they call upon hard and disturbing facts to buttress their case Yet this is not the answer That is **NOT** if we truly wish to preserve the democratic process in this Nation and the Federal System of Government.

The Urban Crisis is a **People Crisis.** It is not a crisis of bricks and mortar; it is not an institutional crisis; it is a **PERSONAL** crisis. That is why we are having riots in the steaming ghettos of megalopolis. That is why your job is the toughest in America today.

When the critics talk of the urban crisis, they state time and again that the city is or is becoming "ungovernable." They are not saying it is "unmanageable" but rather "ungovernable"

There is a very subtle but very real distinction. The first is conceived in the frame of reference of manipulation while the second is conceived in the fine art of friendly persuasion.

Therefore, the art of government constantly demands that we seek out new ways, new methods for achieving our common goal of a stable, functioning, concerned and meaningful society.

In this, Pennsylvania is taking a very active role. However, our efforts are not directed at furthering one level of government over another, but rather in providing the executive framework and legislative tools necessary to recapture this sense of COMMUNITY that is making itself felt across the breadth and width of our Nation.

Primary to this effort was the creation of the Pennsylvania Department of Community Affairs in July, 1966. This was the first such Department formed in the Nation and has been a leader in the development of methods and programs to meet the so-called "urban crisis."

We have put actual dollars into such vital programs as Model Cities, O.E.O., Urban Renewal, Housing, Recreation, Mass Transportation, and others.

—In the summer of 1967 we made $700,000 available to our cities to start Model Cities Planning—Federal funds were not forthcoming until October.

—We have put $3 million of State funds into the State O E O program—the only State in the Nation to do this.

—We developed a tax credit program through our Neighborhood Assistance Act to get industry and business involved in the urban crisis. This will cost the State approximately $8.75 million over the next five years. The first credits were granted this month.

—We initiated a hard-core manpower training program last year with $6 million in State funds. This guarantees a job at the end of the line. Our first graduates—all jobless before—are now earning $5 an hour as heavy equipment operators.

—We were the first State to initiate a State Renewal program in 1949 and last year alone we appropriated some $13 million in this field.

"BEST OF FEED"

for every breed.

Decide today to use them on your farm!

FREY FREE STALL

Lifetime Free Stall Housing

Cut bedding costs 75%, reduce labor for barn cleaning and cow washing; reduce teat and udder injury to the minimum — house your milking herd in free stall housing. Each cow provided a stall for loafing. She won't be stepped on, the rear curb forces manure out into alley for mechanical cleaning or washing. A few minutes twice a day cleans the stalls and curbs, bedding lasts almost forever if your stalls fit the cows. Popular sizes are 6'6", 7' and 7'6". Size 'em by breed.

Our free stall partition may be mounted on wooden head boards or we make a steel divider. Set the legs in 8 to 10" concrete curbs to hold and retain bedding Stall floor can be soil, sand or gravel. Bedding — straw, sawdust, peanut hulls, ground corn cobs, etc Should be installed with paved alley surface 8 feet wide for mechanical cleaning or washing.

● A View

(Continued from Page 18)

—We are spending approximately $100 million in community recreational facility development.

—We are spending almost $40 million a year on mass transportation facilities through cash assistance and the borrowing powers of our new Pennsylvania Transportation Assistance Authority.

—In 1968 it was the State Government that was able to mobilize its funds and resources to aid Pittsburgh during a week of urban rioting.

All of this and much more has been accomplished by State government here in Pennsylvania for the benefit and strength of local government.

But I believe that the most dramatic factor that has been developed and implemented, thus far, to reawaken this entire sense of COMMUNITY, is our PARTNER-CITY PROGRAM.

Under this plan, State Government offers help at the local level. State expertise and State resources are made available, if local leaders, private as well as governmental, agree to work with State Government personnel on a team basis.

This State task force is then matched, man for man, with a local task force composed of civic, industrial, business and governmental leaders under the guidance of a local professional cadre of community development experts. Together they are able to launch a concerted and total attack on the myriad problems facing that area.

At the heart of the Partner-City concept is a plan for leaders of the local-private sector to involve themselves in a critical self-analysis of the community. From this involvement they will be able to learn how the latest techniques of community development can be applied to their given area.

This program is a radical departure from the tried and true grant-in-aid methods that have been functioning across this Nation for the past three decades. It proposes technical aid and personnel as well as financial aid. But most of all it REQUIRES the community, and that includes suburbia, to be an active and dedicated partner, not merely the recipient of funds flowing down from the State and Federal Governments.

If this program is successful, and in the final analysis this will be up to all the people, not State Government, we may be on our way out of the so-called "Urban Crisis."

And we will be on our way out because local, State and Federal leaders stopped vying for power and money, and started cooperating as partners with common goals.

USDA Announces Inspection Fee Changes For Fruit

The U S. Department of Agriculture has announced fee increases for official inspection of fresh fruits, vegetables and nuts at terminal markets, effective July 13, 1969.

USDA's Consumer and Marketing Service said the fee increases are necessary to meet rising costs of operation. The following categories will be affected:

For quality and condition inspections, fees are raised from $15 to $17 per carlot and from $12 to $14 for a half carlot or less, with a maximum of $34 per carlot equivalent when more than one kind of product is involved.

For condition only inspections, the fee is raised from $12 to $14 per carlot and from $10 to $12 for a half carlot or less, with a mixmum of $28 per carlot equivalent when more than one kind of product is involved.

When hourly rates apply, the fee is $7.60 instead of the present $7.

Fees for inspection of shelled peanuts, pecans, or other nuts are raised from 60 cents to 90 cents a ton, with no change in the minimum fee per lot.

Fees for inspection of farmers' stock peanuts and for small lots of fruits and vegetables (such as for export to Canada or for delivery to institutions) remain unchanged.

Inspection in terminal markets, authorized under the Agricultural Marketing Act of 1946, is voluntary and is made available only upon request of financially interested parties. The Act requires fees charged for the service to be reasonable, and, as nearly as possible, to equal the cost of rendering the service.

● Consumption

(Continued from Page 13)

National Pork Producers Council Image Committee is engaged in a market-testing, consumer attitude project.

Robert Nelson, Vice-President, Pork Program of the Meat Board, explained that six cities across the nation are being studied to determine the relative effectiveness of point-of-purchase promotion, paid advertising, and consumer education.

Questionnaires concerning consumer attitudes toward pork and buying habits were answered by homemakers in these cities prior to March—starting date of the campaign and analyzed for changes in consumer responses.

Discussing the program of the Pork Industry Committee, Chairman Noller explained: "Research and education have been recognized as necessary undergirdings to pork promotion-merchandising programs. With the same scientific thoroughness with which it developed the meat-type hog and modern pork products, the pork industry is seeking and finding answers to its image problem. Those answers will be implemented into positive action: correcting misconceptions about the product while building a stronger market for pork."

Meanwhile, the on-going programs of the Committee continue to hammer home to the consumer the doctor, the teacher, that pork is an improved product of great nutritional value with appetite appeal and versatility. The Committee continues to sponsor research on pork cookery—the most recent being a study of internal cookery temperatures for the whole ham It promotes the product in a variety of ways new and revised publications, newspaper and magazine food page services, seasonal point-of-purchase campaigns in cooperation with food stores, as well as visual aids for classrooms, consumer audiences and television and cooperation with state and local pork promotions.

Keep Your Toes

The whirling knife-edged blade of a rotary lawn mower is dangerous, warns the farm and home extension safety committee of The Pennsylvania State University They suggest choosing a mower that is shielded well down toward the ground and respecting it as you would a buzz saw. Being careful may save your toes.

● Have You Heard?

(Continued from Page 17)

after cooking because the seasoning may draw the flavorful juices to the surface and slow the browning.

Prevent Off Flavor In Eggs

Off-flavored eggs are usually caused by improper storage conditions.

The egg shell is porous and can easily absorb odors because small amounts of air normally pass through the shell to keep the egg healthy. The shell has filters for foreign matter but these filters won't stop odor.

Moldy conditions, perfumed detergents, odors from onions, apples, cabbage, citrus fruits, and oils can also show their effects by causing off flavor.

Good ventilation, sanitation, and proper storage conditions are necessary to preserve the flavor of fresh eggs.

Clean surroundings are also important — refrigerator, egg holding room, and clean egg cartons.

Selecting Pork Chops

How do you like your pork chops — dry or juicy? If you like them dry, buy chops cut one-half to three quarters of an inch thick. If you like them juicy — have them cut one inch to an inch and one-quarter thick The thicker chops won't dry out as much during the cooking process.

Barley Crop

The winter barley crop is ripening and soon the combines will be dotting the countyside; this winter grain is gaining in popularity since the market value of wheat is less Combine operators are urged to operate their machines at speeds slow enough to get most of the grain out of the barley heads; this has not always been true in the past as indicated by the great amount of volunteer growth following combining. Grain bins should be cleaned and sprayed with an insecticide to kill all grain insects New barley should not be fed to livestock until it has gone through a curing period of several weeks in the bain or bin

GROW BIG

HEIFERS FAST at low cost with... NEW PURINA HEIFER CHOW

More and more local dairymen are proving that a small extra investment in heifer feeding can pay off when heifers freshen and begin contributing to the milk check.

And research has proved that heifers which produce well in the first lactation continue to be high producers over a longer milking life than average cows.

NEW Purina* Heifer Chow* has been developed to help you grow big heifers fast, conveniently and at low cost. New Heifer Chow is a palatable, coarse 14 per cent protein ration, fortified with vitamins and minerals to stimulate fast, solid heifer growth.

To build low-cost growth, you need feed only 3 pounds of New Heifer Chow per heifer per day if your legume forages are of good quality. For best results, start your heifers on the Purina heifer growing program at six months of age until 90 days before freshening when they'll be fed on the basis of their condition and on the quality of your forage.

Drop in soon and pick up a copy of our New Purina Heifer Growing Program folder. It explains the program to follow for fast-growing, early-freshening heifers at low cost.

PURINA CHOWS ®

Calls For All-Out Effort Against Hog Cholera

Secretary of Agriculture Clifford M. Hardin today called on the entire swine industry to unite in a final "stamping out" efforts against hog cholera

He pointed out that recent State and Federal actions to eliminate the use of hog cholera vaccines have given a new urgency to eradication efforts

"The Department is committed to the success of the hog cholera eradication program," Secretary Hardin said. "We know we have the technical knowledge to knock out this disease."

He continued "We need the help of everyone—producers, veterinarians, market interests, and regulatory agencies—to finish the job and wipe out this costly swine disease as quickly as possible

The nationwide hog cholera eradication campaign being waged by the swine industry in cooperation with the States and the Animal Health Division of USDA's Agricultural Research Service got underway in late 1962 Target date for completion of the program and a "hog cholera free" United States is 1972

The program is divided into four phases with the first two devoted to control measures and the final two aimed at eradicating the disease State and Federal animal health officials are now stepping up their efforts against the disease in States in the final phases of the program Each outbreak of hog cholera is handled on an emergency or "stamp out" basis This means prompt and complete disposal of all infected herds, with cooperative State-Federal indemnity payments to help compensate owners for hogs that must be destroyed because of the disease

Pesticides Approved For Safety And Effectiveness

Regulation of pesticides carried out by federal and state agencies assures effectiveness and consumer safety, says D L. Bierlein, pesticides coordinator of The Pennsylvania State University

A manufacturer who proposes to offer a new chemical needs registration from the U S Department of Agriculture, and he must demonstrate the usefulness and effectiveness of the product.

Data given also include long-term and acute effects found on highly sensitive test animals. The Pesticides Regulation Division of USDA's Agricultural Research Service then studies the data The Service determines whether the product will be effective for its proposed use, and even more important it will be safe when used as directed Dr. Bierlein explains If its safety cannot be demonstrated, the product won't be registered regardless of its effectiveness

If a USDA approved chemical is intended for use in food products, the Food and Drug Administration tests it for pesticide residues in food stuffs A tolerance level is then established by the FDA according to what is safe over a prolonged period of time

The general rule for a tolerance level is set at 1/100 of the lowest level at which effect on animals can be discerned

Federal regulations to insure the safety of foods apply only to materials shipped interstate, points out Dr Bierlein The FDA has control over the marketing of pesticidal chemicals only where the items are represented as having therapeutic use or where they are subject to the food additives section of the Federal Food, Drug, and Cosmetic Act

Hunting Aided By Wildlife Studies

Studies of wildlife are helping to provide basic information needed for a balance between successful hunting and protection of forests and other resources, says James S Lindzey, leader of the Cooperative Wildlife Research Unit at The Pennsylvania State University. Dr. Lindzey and associates are conducting field experiments on the 6,800 acres of the University Experimental Forest in Huntingdon County.

The work is designed to aid in evolving new management programs that will increase wildlife habitat productivity while reducing conflicts between wildlife interests and other human interests such as farm crops and timber production.

Initial phases of several long-range studies stress collection of information on behavior, physical characteristics, and harvest of game animals from selected sites. This is done, Dr. Lindzey explains, to examine productivity of sites, condition of animals, and recreational and economic impacts.

The area has provided considerable recreation for hunters, with up to 10,000 man hours a year recorded for deer hunting alone A total of 930 deer have been harvested from the Experimental Forest in eight years Hunters have been very helpful in providing information for the research team.

The best deer browse has been found where openings exist in the forest An area including 2,000 acres of mixed oak woodland was found to produce enough browse for 58 deer if the deer ate nothing but browse the year around Wild turkeys spend most of their time in forests of mixed oaks, according to another study. A few wild turkeys have been trapped and equipped with radio transmitters to trace their movements

Gray squirrel trapping has been carried out in the Shaver's Creek section of the Experimental Forest A recent phase of the study suggests that more than twice as many squirrels occupied uncut areas as compared to cut areas Squirrels in the cut areas traveled twice as far from their den trees as those in the uncut areas

Pioneer Announces New Alfalfa Variety

The Pioneer Corn Company Inc, with several research locations in the Midwest and eastern United States, announces the naming and production of a new alfalfa variety, namely 520 adapted to the Midwest and eastern United States This new variety has dark green foliage color which should be of particular interest to dehydrators and others interested in producing high quality alfalfa

520 is a eight clone, wilt resistant, winter hardy synthetic variety adapted to the areas where Vernal and Ranger are presently grown 520 has averaged more than 10 percent more hay per acre than Vernal or Ranger in tests conducted over a four year period in Iowa, Illinois, Minnesota, Wisconsin, and Pennsylvania It is more resistant to downy mildew than either Vernal or Ranger 520 represents a major improvement over other available alfalfas in resistance to the leaf spot caused by Leptosphaerulina 520 produces somewhat more growth in the late fall period than does Vernal.

Pioneer Brand 520 Alfalfa was favorably reviewed by the National Certified Alfalfa Variety Review Board at its December, 1968 meeting and has been accepted for certification

Final Action On Pesticide Label Wording Delayed

Final action on a proposal to standardize meanings and uses of words, phrases, and symbols on pesticide labels has been postponed about two months, until Aug. 1, the U.S. Department of Agriculture reports.

Additional time is be allowed for industry to evaluate and prepare comments on the proposal, which modifies Interpretation 18 of the Federal Insecticide, Fungicide, and Rodenticide Act. Notice of the extension is to be published in the Federal Register June 17 by USDA's Agricultural Research Service.

"The proposed revision was originally published in the April 4 issue of the Federal Register and interested parties were given 60 days to submit comments," explained Dr. Harry W. Hays, Director of ARS' Pesticides Regulation Division "But the modification of Interpretation 18 is of such a sweeping nature that manufacturers requested additional time to study possible effects on their development, marketing, and advertising programs."

"The revision of Interpretation 18 will provide better consumer protection in the use of pesticides," Dr. Hays said. "At present, there is no standard working or phrasing for warning, caution, and antidote statements. Label information on similar products may be phrased many different ways, thus confusing and misleading purchasers."

Persons desiring to submit written data, views, or arguements relating to the proposal should send them in triplicate to the Director, Pesticides Regulation Division, Agricultural Research Service, U.S. Department of Agriculture, Washington, D. C. 20250.

PENNSYLVANIA EGG MARKETING ASSOCIATION MEETING MINUTES JUNE 13, 1969

President Ben Burkholder called for the Treasurer's report which was accepted, he then introduced several visitors

Inasmuch as there was considerable material to cover, President Burkholder called on the first member of the panel to discuss "Todays and Tomorrows Problems".

Sam Berenson . . "Several pricing methods have been advanced but on committee pricing might be difficult because of representation without knowledge of the industry "It has been established that, the New York Merchantile Exchange, and the pricing operation has become antiquated and should be changed "Any one in the industry who may have any suggestions regarding changes in the Exchange should contact Wynn Gehgan of North America "One suggestion that should be emphasized is a two day a week market. "Now that inventory data is being gathered across the country, the information should serve to establish better market values. 'There should be nothing fraudulent about influencing a market with supply facts'.

"Industry members, as a whole are complacent with only a few carrying market responsibilities. 'Every Industry Member must support the Industry financially, morally, and physically 'Pricing is one of the most important factors giving the industry the proper support it needs'

John Wenger . . . "Merchandising and price cutting are hurting the industry and should be adjusted "Flexible pricing will crop up from time to time and continue to be a major problem. "The balancing of longs and shorts makes the Exchange absolutely necessary. "There should be a synchronizing of production by suppliers "Quality and moulting will continue to be problems. therefore some kind of guide lines should be established. "Large producers should lean on experienced marketers to market their product rather than try to market without sufficient marketing knowledge. "High interest rates will continue and will be a problem to the industry".

Ray Sauder . . . "Something should be done about high cost of production, especially as it relates to feed costs "Other areas purchase feed for much less and we must compete".

Earl Hess . . "In the future the industry will need marketing specialists more than ever "Merchandisers need a great deal of assistance and as time moves on regulations will become more difficult to cope with".

"Consumers frequently shift eggs to get a better buy, and then an inspection may cause a supplier to get in trouble "Promotion is a must and should receive total industry support. "Egg marketing groups such as PEMA should have sufficient money to provide exhibits at food shows etc, to get the story to the people who count in holding and uping consumption"

A motion was made, seconded, and passed that a letter be sent to the New York Merchantile Exchange, recording the fact that PEMA is interested in twice a week pricing instead of daily.

A motion was made, seconded, and properly passed that the PEMA and Federation consolidation be opened for further discussion

It was decided that a mail ballot be sent to each member providing them with an opportunity to express their feeling about the PEMA-Federation Alliance

A motion was made, seconded. and properly passed that the PEMA Executive Committee be given the authority to negotiate with the Poultry Federation in providing a strong alliance with representation.

A motion was made, seconded, and passed that, the PEMA dues be increased to $60 a year . because there is more expense involved in operating an organization and no change has taken place in 16 years

These tractors are equipped with the famous DEUTZ Air-Cooled diesel engine . . .

Outperforms any water-cooled diesel engine.
Options include all the latest features.
Four-wheel drive available.
